## INTRODUCTION

If you are an individual seeking a position in teaching or administration, what opportunities are likely to be available? What subject fields or combinations of subjects are in most demand? For which level, elementary, secondary, or college, are requests for teachers most frequently made? From what part of this country or of the world are vacancies reported?

If you are an adviser of students, how should you answer such questions as those in the first paragraph which may be asked by your students?

If you are an employer of teachers, how many graduates are available in relation to the number of vacancies?

The Office of Teacher Placement of the University of Illinois presents herewith data which may help you answer these questions. The data are based upon an analysis of the vacancies reported to the Office of Teacher Placement during the period September 1, 1953 to August 31, 1954.

Staff members of the Office of Teacher Placement will be pleased to discuss placement problems with you. The services of the staff are available without charge. Come in person or call the office:

Office of Teacher Placement  
University of Illinois  
200 Gregory Hall  
Urbana  
Telephone: 7-6611, Ext. 137

Areas of primary responsibility of staff members (all attempt to keep informed in all areas, however):

Gilbert C. Kettelkamp -- Commercial subjects, foreign languages, home economics, and music.

Frank C. Noble -- Elementary, art, and special education.

William R. Slothower -- English, library, social studies, and speech.

Curtis R. Stafford -- Follow-up of graduates in-service.

Joseph V. Totaro -- Agriculture, industrial education, mathematics, physical education, science, and all college subjects except education.

J. Lloyd Trump -- School administration and education.

Mary F. Mauk -- Chief Clerk

SOME GENERALIZATIONS BASED UPON AN ANALYSIS  
OF THE VACANCIES REPORTED

1. More vacancies were reported to the Office of Teacher Placement at the University of Illinois during the period, September 1, 1953 to August 31, 1954 than in any other similar period during the past 20 years (see Chart 1, page 4). As a matter of fact more vacancies were reported during the present year than in any similar period in the 42 years during which teacher placement has been an organized activity at the University of Illinois.
2. The Office receives vacancy reports for all grade levels (see Chart 2, page 5 and the table on page 6). The number of calls for secondary and elementary teachers received was about the same; in each case, the number was about double that of the college calls.
3. Among the vacancies reported were 126 for which only Negro candidates were requested to apply: 32 elementary, 32 secondary, and 62 college. Further details regarding these vacancies may be obtained from the Office of Teacher Placement. Some vacancies specify members only of certain religious groups. The laws of the State of Illinois do not permit specification of information with reference to religion of registrants nor are these vacancies filed in religious categories.
4. Vacancies were reported from all 48 states, and many foreign countries. (see the table on page 7)
5. Almost one-half of the elementary and secondary school teaching vacancies reported to this Office were in Illinois (see Chart 4, page 9).
6. The four most frequently requested secondary subject areas in the vacancy reports were English, music, special education, and girls' physical education, in that order (see Chart 3, page 8).
7. About 40 per cent of all of the elementary school vacancies were for teachers of the primary grades (see Chart 5, page 10). The types of vacancies are shown in the tables on pages 6 and 11.
8. The three most frequently reported types of vacancies in college teaching positions were for teachers of education and psychology, science, and for critic teachers in teacher education programs (see Chart 6, page 16). The number of vacancies in different subject areas are shown in the tables on page 6 and Chart 6, page 16, and the locations of the vacancies are shown in Chart 7, page 17.
9. A considerable number of vacancies in foreign countries were reported (see Chart 8, page 22 and the tables on pages 7 and 23.)

Digitized by the Internet Archive  
in 2013

10. The vacancies in educational administration were nearly equally divided among superintendencies, high school, and the elementary school principalships (see the table on page 24).
11. Some changes from the previous report on "Employment Opportunities" presented two years ago include the following: the total number of vacancies reported increased from slightly under seven thousand to more than nine thousand; proportionately there were more elementary and fewer secondary vacancies reported while college openings remained about the same; among the combined departmentalized-elementary and secondary fields home economics ranked sixth this year in place of third in the previous report; girls' physical education vacancies increased so the relative position is fourth instead of sixth; relatively fewer of the elementary vacancies in 1953-54 were for teachers in the primary grades although such vacancies made up about 40 per cent of the openings reported; there was a proportionately larger increase in vacancies in the upper elementary (non-departmentalized) grades; there was a substantial reduction in college vacancies reported in education and psychology while significant increases may be noted in the demands for critic teachers and in such fields as English, industrial arts, languages, science and social studies.
12. A comparison between the number of students enrolled in teacher education programs, as shown in the table on page 25, with the vacancies reported on page 6, shows dramatically the nature of the teacher shortage as it relates to graduates of the University of Illinois; for example, there are 3 mathematics teachers in training this year with 282 vacancies reported in 1954.

J. Lloyd Trump  
Head of Teacher Placement

## SALARIES OF TEACHERS AND ADMINISTRATORS FOR 1954-55

This study of teachers' and administrators' salaries for the school year 1954-55 is based on data reported to the Office of Teacher Placement, University of Illinois, by registrants who obtained positions new to them.

The study has several limitations that should be noted at the outset. Of the total number of salary and position reports received by the office, approximately one-third were not usable for the purpose of the study. They were discarded for several reasons, including salary not reported or reported on weekly or monthly basis, type of position not reported, position reported outside of teaching field, and the like. What sort of bias is introduced by this factor is a matter of conjecture. Another limitation lies in the fact that although beginning teachers have been differentiated from experienced ones, the number of years of experience is not indicated. This would tend to be a biasing factor if in a specific field a comparatively larger number of people of considerable experience were placed.

With the foregoing limitations in mind, the data in the following table show the average salaries being received for the school year 1954-55 by people in various positions. The fields of agriculture, home economics, special education, physical education and music are presented separately because these fields often cut across the regular elementary-high school division; in some cases salaries in these fields are somewhat higher than in regular academic areas.

POSITION	AVERAGE SALARY 1954-55	
	Experienced	Beginners
Elementary (K-6)	3,753	3,306
Junior High School (7-9)	3,913	3,263
All Elementary (K-9)	3,832	3,283
Vocational Agriculture	4,633*	4,102*
Home Economics	3,893	3,477
Special Education	3,927	3,209
Physical Education for Men	4,121	3,680
Physical Education for Women	3,397	3,305
Music Education	3,893	3,325
High School (All Other Subjects)	4,028	3,385
All High School	4,059	3,460
College Teaching	4,369	3,858
Administration		
College	6,068	
High School Principals	5,612	
Elementary Principals	4,500	
Superintendents	6,565	

\*plus traveling expenses and payment for adult classes in many cases.
